

# Transforming Care Through Next Generation Therapies in Diabetic Macular Edema to Lower Burden and Improve Outcomes

## Event Agenda

Wednesday, February 26, 2025 at 7:30pm CT - 8:30pm CT

**i** All times listed in Central Time (US & Canada).

Wednesday, February 26, 2025

7:30pm - 8:30pm

**Transforming Care Through Next Generation Therapies in Diabetic Macular Edema to Lower Burden and Improve Outcomes**

Sunir J. Garg, MD, FACS

1.0 CE Credit

Learning Objectives:

- Evaluate adherence barriers in DME treatment, including injection frequency and patient factors
- Analyze the duration of effectiveness in established and emerging therapies for DME
- Identify patients eligible for dosing modifications or transitioning to longer-lasting therapies, based on individual, treatment, and disease considerations
- Apply optimal treatment selection and dosing strategies to personalize care for DME patients
